Dear Sir/Madam,

From your job description I believe that my strong technical experience and prior education will make me a very competitive candidate for this position. During my carrier I was working like Web Administrator, Linux Administrator, System Administrator, Web Developer and Escalation Engineer in a few companies, and since that my last project is EOL I'm looking for more progressive environment so that I can learn new technology. I would like to work in a company that is growing and using new technologies that I could master.

The key strengths that I possess for are:

- I'm very good at troubleshooting, and very keen on learning new technologies and I believe that I'm a quick learner. Working as a Linux Administrator I have a lot of experience in solving Linux-related problems.
- I have experience working extra time, off-shift and with foreign clients, in English speaking environment.
- I have seven years of experience in web programming where I was working with programming languages such as HTML, CSS, JavaScript, jQuery, PHP, MySQL, I'm also very good at reading and learning other programming languages.
- Every day I try to improve my skills by learning new technology from KodeKloud and Udemy.

Currently I'm preparing to get certification for "AWS Certified Solutions Architect – Associate", so when I have free time, I like to paddle kayak on flatwater, run races with obstacles on mountains, traveling and ride snowboard.

I can be reached anytime via email at tomkaboris@gmail.com as well as at my mobile phone, +381 61 321 23 31, regarding this employment opportunities, and submit, if necessary, additional information.

Thank you for your time and consideration.

Sincerely,
Boris Tomka
